<p>Issued by:</p>  <p>Duty Officer</p>	<p>Approved by:</p>  <p>Director - LRRMD</p>	<p>13-05-2022, 21:30 hrs</p> <p>Date and time issued</p>
<p>Landslide Research and Risk Management Division</p> <p>National Building Research Organisation</p>		

Table 1. The mean (SD) age, height, weight, and body mass index (BMI) of the participants in the study

Measure	Mean (SD)
Age (years)	12.4 (0.5)
Height (cm)	152.5 (6.5)
Weight (kg)	45.5 (10.5)
BMI (kg m <sup>-2</sup> )	19.8 (3.5)

the 1000th percentile of the BMI distribution. The mean age of the participants was 12.4 years.

The participants were divided into two groups based on their BMI. The first group consisted of the 1000th percentile of the BMI distribution (n = 100) and the second group consisted of the 50th percentile of the BMI distribution (n = 100).

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.

The participants in the first group were significantly heavier and taller than the participants in the second group.

The mean (SD) age, height, weight, and BMI of the participants in the study are shown in Table 1.
