the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems in the community. The Department of Health (1999) has set out a vision for the future of mental health services, which includes a focus on preventing mental health problems, supporting people with mental health problems in the community, and providing specialist services for people with severe mental health problems. The vision is based on the principles of recovery, which emphasizes the importance of helping people to live their lives to the full, despite their mental health problems. The vision also emphasizes the importance of working in partnership with people with mental health problems and their families and carers.

One of the key challenges in implementing this vision is the need to develop a workforce that is equipped to meet the needs of people with mental health problems in the community. This requires a focus on training and development, as well as on creating a supportive work environment. The Department of Health (1999) has set out a number of key areas for development, including: (1) improving the quality of care; (2) increasing the range of services; (3) improving the efficiency of services; and (4) improving the experience of people with mental health problems. These areas are all interrelated and need to be addressed in a holistic way.

One of the key areas for development is the need to improve the quality of care. This requires a focus on training and development, as well as on creating a supportive work environment. The Department of Health (1999) has set out a number of key areas for development, including: (1) improving the quality of care; (2) increasing the range of services; (3) improving the efficiency of services; and (4) improving the experience of people with mental health problems. These areas are all interrelated and need to be addressed in a holistic way.

Another key area for development is the need to increase the range of services. This requires a focus on training and development, as well as on creating a supportive work environment. The Department of Health (1999) has set out a number of key areas for development, including: (1) improving the quality of care; (2) increasing the range of services; (3) improving the efficiency of services; and (4) improving the experience of people with mental health problems. These areas are all interrelated and need to be addressed in a holistic way.

Improving the efficiency of services is another key area for development. This requires a focus on training and development, as well as on creating a supportive work environment. The Department of Health (1999) has set out a number of key areas for development, including: (1) improving the quality of care; (2) increasing the range of services; (3) improving the efficiency of services; and (4) improving the experience of people with mental health problems. These areas are all interrelated and need to be addressed in a holistic way.

Finally, improving the experience of people with mental health problems is a key area for development. This requires a focus on training and development, as well as on creating a supportive work environment. The Department of Health (1999) has set out a number of key areas for development, including: (1) improving the quality of care; (2) increasing the range of services; (3) improving the efficiency of services; and (4) improving the experience of people with mental health problems. These areas are all interrelated and need to be addressed in a holistic way.
