the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (1999) has identified the need to develop a new approach to the care of the elderly, and the Health Service Research Department (1999) has identified the need to develop a new approach to the care of the elderly.

The purpose of this paper is to review the literature on the health and social care needs of the ageing population, and to identify the key issues that need to be addressed. The paper is organized as follows. First, we review the literature on the health and social care needs of the ageing population. Second, we identify the key issues that need to be addressed. Third, we discuss the implications of the findings for policy and practice.

The literature on the health and social care needs of the ageing population is extensive.
